WHY NOW

# Safety leadership without digital skills has become a career liability.

The PROBLEM?

Traditional “mainstream” EHS education has focused on building compliance-ready professionals. The world has changed yet the curriculum of most qualifications **remain the same.**

THE SOLUTION

# About SafetyTech Academy

Founded by Lucas Domingues in 2025, the SafetyTech Academy rapidly became the go-to training provider for EHS professionals aiming to develop digital skills and literacy in the AI era.

With almost 20 years of international experience in high-risk industries, including construction, oil & gas, electric vehicles, and clean energy, Lucas brings real-world insights, practical lessons, and a passion for helping safety professionals thrive in an increasingly digital and technology-driven world

The mission is clear: LEAD SAFETY FORWARD to support EHS practicioners navigate the AI transtion through practical and bespoke learning to develop soft, power and technical skill not taught by mainstream training providers in EHS.

Imperial College Business School · KING'S College LONDON KING'S BUSINESS SCHOOL · London Business School · Universidade Federal Fluminense · UFRJ · iosh Chartered Safety and Health Professional

WHY SAFETYTECH ACADEMY

# Built by practitioners. Approved by IOSH. CPD Certified.

Generic AI training teaches your team what a language model is. It doesn't stick.
We prepare them to lead with AI & tech confidently, ethically and effectively.

Our programmes speak the language of EHS: hazards, risks, controls, competence, assurance with one operating principle:

→ **AI drafts, a competent person underwrites.**
Technology never replaces professional judgement. It enhances it.

### IOSH-approved, CPD-accredited

The first Safety 4.0 programme approved by IOSH — independent assurance the content meets professional standards.

### Meet the founder

Led by **Lucas Domingues MSc CMIOSH,** former global head of SHEQ across oil & gas, robotics, EV and clean energy.

### Trusted at leadership level

Cohorts attended by VPs, Directors and Heads of EHS from global insurance, engineering and pharma organisations.

### Zero technical jargon

No coding. No data science. Plain-language capability for leaders who govern AI — not build it.

THE FLAGSHIP PROGRAM FOR EHS TEAMS

# You have the tool license. Now, build capability.

Most EHS teams spend 70% of their time on admin instead of field work prevention initiatives. Deploy AI-ready capabilities that reduce incidents, prevent hazards, and boost team productivity.

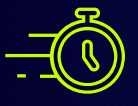

01 · TEAM TRAINING

## COPILOT FOR EHS & SUSTAINABILITY

Practical, audit-ready Copilot training for EHS & sustainability teams — built for the EU AI Act Article 4 obligation.

**Designed for team-wide rollout — the fastest route to demonstrable, EHS organisation-wide capability.**

Your team already has the M365 Copilot licence. Under the EU AI Act, organisations now have a legal duty to ensure adequate AI literacy — but this is the floor. The ceiling is what your team is capable of when using AI to effective improve safety performance and unlock team productivity.

THE PROGRAMMES

# The professional journey. Three paths of literacy.

Our learning path delivers on what you need. No hype, no technology jargons.

NEW

01 · LITERACY ESSENTIALS

## Fundamentals of AI in EHS

The baseline every member of your EHS function needs: what AI can and cannot do, where it already touches safety work, and how to use it without creating new risk.

**Designed for team-wide rollout — the fastest route to demonstrable, organisation-wide Article 4 coverage, with completion records for every participant.**

02 · AI FLUENCY — SELF-PACED

## Safety 4.0: Leading Safety in the Digital Age

A self-paced eLearning programme for mid-career EHS professionals.

**On demand, on their schedule — built for mid-carrer professionals who cannot block out cohort dates but cannot afford to fall behind.**

03 · LEADERSHIP — LIVE COHORT

## Safety 4.0 Accelerator

Our flagship live cohort for senior EHS leaders. Structured sessions, peer exchange, and a capstone where each participant builds a real AI initiative for their own business.

**Transformation, not awareness — participants leave with a working capability and a deliverable their board can see.**

AI LITERACY ESSENTIALS

# Fundamentals of AI in EHS ✨

Build the AI literacy every modern EHS professional needs in just 90 minutes. Practical. No jargon. No buzzwords. Just actionable skills you can start using immediately.

- Understand what AI is and how it applies to EHS
- Use AI tools responsibly and effectively
- Identify practical use cases that save time and improve decision-making
- Recognise common risks and limitations of AI
- Write effective prompts that produce better results

VOICES FROM THE COHORT

# What alumni are saying.

★★★★★

The course was great. I had been very nervous about AI, and this brought the AI tool into perspective and showed me how I can best use it in my operations.

**Dan Warnock**
Risk Control Director

MARSH

★★★★★

I often say I'm not a “silver surfer,” but I'm proud to describe myself as a 50-year-old vibe coder. That shift in mindset came directly from the Safety 4.0 Academy.

**Stewart Deary**
EHS Director

CTRS GLOBAL

★★★★★

This programme bridges the gap between traditional safety and digital transformation perfectly. The practical applications will upgrade our safety management systems.

**Eamonn Doherty**
VP EHS

DP WORLD

★★★★★

I really enjoyed how the curriculum explained the transition from traditional safety management to Safety 4.0. It helped me think more proactively about using data and technology to prevent incidents.

**Renauld Wilson**
Senior Risk Manager
