SAFETY 4.0 - LEADING SAFETY IN THE DIGITAL AGE

SMARTER LEADERS SAFER WORKPLACES

The course felt like a great entry-level introduction to how AI technology is influencing today's HSE leadership. What stood out first was the high production quality and the way the ideas were brought to life through polished, relevant examples that made the topics easy to understand.

Are Safety Leaders Ready for the Digital Age?

The reality is simple: Your career is at **an unprecedented crossroads**. While AI and digital transformation reshape the safety industry at breakneck speed, most safety professionals are being left behind—unprepared and unequipped for what's coming. Traditional safety certifications won't protect your career anymore. Companies are actively seeking safety leaders who can leverage AI and digital tools.

Introducing the Safety 4.0 Academy

The curriculum bridges the gap between traditional safety management and the digital future.

Created by **Lucas Domingues**, Founder & CEO of Shield360, this course distills years of experience in tech-driven safety transformation into a concise, accessible, and actionable program.

IOSH Approved Safety 4.0 – Leading Safely in the Digital Age helps you:

- Understand how emerging technologies reshape the world of safety.
- Learn practical ways to use AI and digital tools responsibly.
- Build the mindset of a future-ready safety leader.
- Position yourself as an innovator in your safety organisation.

It's not about replacing humans with AI — it's about empowering them through technology.

Approved by IOSH, the worlds largest organisation for Health & Safety professionals, and **CPD certified**, this course is a legit and innovative way to stay ahead and lead safety future-ready.

Learning Objectives

The aim of the Academy is to equip safety leaders with the knowledge, skills, and practical tools to lead a successful Safety 4.0. transformation, harnessing digital technologies, AI, data, and modern leadership strategies to create safer, smarter, and more proactive workplaces.

- **L01.** Define the concept of Safety 4.0 and its importance in the context of the Digital Age
- **L02.** Describe the limitations of traditional safety approaches and the risks of the reactive safety trap.
- **L03.** Identify the key skills and leadership capabilities required by safety professionals in the digital age.
- **L04.** Classify core SafetyTech systems, tools and emerging technologies relevant to modern safety management.
- **L05.** Interpret how data can be transformed from scattered inputs into meaningful insights.
- **L06.** Explain the role of artificial intelligence (AI), including LLMs and computer vision, in workplace safety and also the importance of risk, compliance and governance
- **L07.** Define the essential components of a digital safety transformation plan and business case.

Who This Course Is For

If you're responsible for protecting people, leading teams, or driving safety performance — this course was built for you.

Perfect for:

- **EHS Managers & Heads of Department**

Who want to modernise their approach and leverage technology to move from reactive to proactive safety.

- **EHS Directors & Senior C-suite Leaders**

Who need to understand how digital transformation reshapes compliance, risk, and workforce engagement.

Syllabus

IOSH Approved

- #8 - AI REVOLUTION
- #9 - COMPLIANCE, RISK & GOVERNANCE
- #10 - SAFETY DIGITAL TRANSFORMATION

PLUS 2 BONUS MASTERCLASSES

What EHS Leaders Are Saying

★★★★★

”

"As an HSE leader, I found the content highly relevant to the current needs of the industry. The online training provided clear insights into modern HSE strategies and the latest safety technologies that organizations must start integrating. It was to the point, forward-thinking, and aligned with the real challenges HSE leaders face today. This program is an excellent opportunity for anyone looking to upgrade their knowledge, improve their implementation approach, and stay updated with the latest advancements in safety."

Shebin Abraham
Founder

★★★★★

”

"To be honest, my knowledge about SafetyTech and AI in general was not very good at all. I really enjoyed the fact that it is simple to understand and designed for people who, such as myself, have very little knowledge on the subject. I also really enjoyed the practical examples as they helped me understand the applications of SafetyTech better."

Ana Coutinho
HSE Manager, LEGO Group

★★★★★

”

"This program bridges the gap between traditional safety and digital transformation perfectly. The practical applications have revolutionized our safety management systems."

Eamonn Doherty
HSE Director, SAMA Construction

★★★★★

”

"The AI-powered safety analytics completely transformed how we predict and prevent incidents. Our accident rate dropped significantly in the first year."

Ben Canterbury
Corporate Safety Manager, QTC Technologies

★★★★★

”

"Safety 4.0 is a solid introductory course for anyone looking to understand how technology is shaping modern health and safety work. The content is clear, accessible, and supported by well-produced examples that make the concepts easy to follow. It's a great starting point for OHS professionals wanting to build confidence in the health and safety tech space."

Jacqueline Carr
Global OSH Consultant, Siemens

★★★★★

”

"I've just completed Safety 4.0 - Leading Safety in the Digital Age. The course was relevant, easy to digest and thought provoking. It is aimed at organisations at all stages on their digital transformation journey so has something to offer, whatever the current progress in this area. Particularly like that it is IOSH Approved too."

Stephanie Osborne
Health & Safety Leader

★★★★★

”

"The Safety 4.0 methodology has revolutionized how I coach teams on workplace safety. The digital tools provide incredible insights for performance optimization."

Alex Siedschlag
Performance Coach

★★★★★

”

"This course did a great job in bridging traditional safety management and the digital future that we're already living in. I enjoyed the later modules that dove into safetytech applications with things like wearables, computer vision, mobile report and AI. The lessons presented by Lucas made it clear that integrating data from multiple sources is critical to prevent harm before it happens. This course gives you the vision and the roadmap to make it happen."

Emily Haas
Associate Safety Director, National Institute for Occupational Safety and Health

★★★★★

”

"Safety 4.0 is a great entry-level course for EHS professionals starting their journey into Industry 4.0 and health & safety tech. It introduces AI concepts in a clear way and includes practical tips and tricks that make applying the knowledge easier."
